

# clj-mook

A clojure library for testing web apps

<http://github.com/threatgrid/clj-mook>

# What is it?

- Persistent session abstraction
- Default request parameters
- HTML parsing and extraction

# Session tracking

- Base URL
- Current URL
- Cookies
- Last request and response
- Storing arbitrary values

# Default Request Parameters

- Sending session cookie
- CSRF tokens
- API keys as params or headers
- HTTP Auth

# HTML Parsing and Extraction

- Minimal Jsoup wrapper
- Use in clojure.test assertions
- Extract form values
- Screen scape
